

## Resolved: Known Issue - KI9.2-129\_BP– MCOP Row Import Issue

**UPDATED:** March 16, 2021

**STATUS:** Resolved

---

**RESOLUTION:** Budget Prep was updated in GeorgiaFIRST Release 5.64 and AU Financials Release 1.34 to import compensation entries for Multiple Components of Pay. With this change, Job Earns Dist entries are no longer used for funding of funding splits within Budget Prep resolving this issue.

**NAVIGATION:** Navigator > BOR Menus > BOR Budget Prep > Budget Prep Data Updates > Personal Services

**ISSUE:** Budget Prep is built to use Job Earns Dist (JED) entries set up by percent. With the change to Multiple Components of Pay (MCOP), JED entries are now set up by amount in OneUSG Connect. Any positions with JED entries by amount will import from OneUSG Connect to Budget Prep with blank fields for Percent of Distribution and Fringe Percentage entries, making the Distributed amount calculate to 0.
